Paris • +34 675 949 638 • tytanesk.dev@gmail.com

Senior Software Developer

Software Developer specializing in Python backend systems and modern frontend development, focused on building scalable, production-ready applications. Experienced in designing clean APIs, developing React-based interfaces, and deploying cloud-native solutions using AWS, Docker, and Kubernetes. Strong background in integrating AI into real-world systems with an emphasis on reliability and maintainability. Comfortable working across the stack, with a primary focus on backend architecture and system performance. Experienced in Remote environments, delivering efficient solutions aligned with business needs.

WORK EXPERIENCE

Self-employed • Remote • 11/2025 - Present

Senior Software Developer

- Develop and deploy custom web applications and AI-driven solutions for international clients across diverse industries.
- Design and implement scalable, Full-stack architectures using Python, JavaScript/TypeScript, React.js, Node.js, and cloud technologies (AWS, Docker, Kubernetes).
- Collaborate with clients remotely to gather requirements, deliver high-quality solutions, and ensure performance, reliability, and maintainability.

ARHS Group • LU • 05/2024 - 08/2025

Full-Stack AI Developer

- Developed and deployed 8+ AI-driven features and 5 full-stack web applications, integrating machine learning models into production systems that improved workflow efficiency by 30% and reduced manual processing time by 40%.
- Designed and maintained scalable architectures and data pipelines handling 78K+ daily requests, achieving 99.9% uptime and reducing system latency by 25% across distributed environments.
- Delivered end-to-end solutions using Python, JavaScript/TypeScript, React.js, Node.js, TensorFlow, PyTorch, and cloud technologies (AWS, Docker, Kubernetes), accelerating deployment cycles by 35% and improving system performance by 20%.
- Collaborated with cross-functional teams of 6–10 members to implement full-stack solutions, optimize performance, and deploy AI-enabled services, contributing to 3+ successful product releases and enhancing overall development efficiency by 30%.

Accenture S.L. • ES • 02/2021 - 03/2024

Data Scientist

- Developed and deployed 12+ machine learning and deep learning models (classification, regression, NLP), improving prediction accuracy by 20–35% and integrating them into production systems supporting 50K+ users.
- Performed advanced data analysis and feature engineering on large datasets (10GB–200GB), increasing model performance by 25% and reducing training time by 30% through optimization techniques.
- Collaborated with cross-functional teams of 5–8 members to deliver end-to-end data science solutions, ensuring 97% pipeline reliability, accelerating deployment cycles by 28%, and contributing to 4+ successful AI-driven projects.

EDUCATION

Master in Computer Science

University of Luxembourg • LU • 10/2019 - 11/2020

Bachelor in Computer Science

University of Málaga • Málaga, ES • 09/2015 - 09/2019

SKILLS

AI & Machine Learning: Data Preprocessing, Deep Learning, LLM, Machine Learning, Model Deployment, Neural Networks, PyTorch, Scikit-learn, TensorFlow

Backend Development: Authentication & Authorization, Distributed Systems, Django, FastAPI, Microservices, Node.js / Express, React, REST API, System Design

Frontend Development: API Integration, HTML / CSS, Next.js, React.js, State Management, Tailwind, Vue.js

Cloud & DevOps: AWS, CI/CD, Cloud Deployment, Docker, Infrastructure Automation, Kubernetes, Linux

Databases: Database Modeling, MongoDB, MySQL, PostgreSQL, Redis
